Catching Fish for a Living

Submitted by jcupp on May 17, 2014

USAID links small-scale farmers and fishermen like Rahim to regional markets to sell fish, shrimp, vegetables and rice. This improves their livelihoods and broadens the market, keeping costs down to ensure that even the poorest communities still have access to nutritious food. Last year, USAID helped farmers in Bangladesh increase fish sales by a total of nearly \$40 million, contributing to Feed the Future's goal to reduce poverty. *Photo by Wasif Hasan, USAID*
